

Do you want that your country look like this?

Do you want that our country will be a more safe place?

Do you want that your firm to respect the law? You must take measure!

If you want that you must do somethings

!

Incineration waste products service offered by

SIC BIOFLAME SRL

Bioflame Romania, a waste processing company, offers you the possibility of **incineration in ecological conditions** of goods included in the Waste European Catalogue up to the 20.01.18 position inclusive. According with the impact investigation and the incinerator technical documentation, we have the possibility to incinerate all waste range excepting:

- radioactive waste;
- waste with blast danger;
- pathological waste from laboratories and research institutes as a result of medical experiments.

OUR SERVICES

Bioflame is collecting waste at the customer door on a **document basis** which certifies that our company takes over all the **responsibilities** of the waste processing (expired pharmaceutical, waste products from hospitals, consulting rooms, human and veterinary medical laboratories, adulterated foods, cosmetics, food additives).

We are able to perform destruction operations under **suspensive customs regimen** (from bonded warehouses).

Purpose and Mission

The purpose to this marketing plan is to start a new business which endors big firms and citizen also.

S.C. Bioflame S.R.L will have the main activity to collect and burn drump goods.

The need for our business idea is a healthy environment and our customers need to get rip of their trash.

What do we want to realize?

- An incineration plant for dangerous waste
- We want to offer an energy source(thermic or electric)

Why do we want to make this investment?

This investment will resolve two problems:

- the waste problem which are dangerous for the medium (we will resolve this problem by separate them by categories, manipulation, transport, incineration and disinfection).

- Recover the energy from wastes and used for community interest.

Examples of dangerous waste

- Medical waste
- Medicine
- Cosmetics
- Oil
- Oil residue
- FMCG products which are expire
- Promotion products
- Textile impregnate with miscellaneous substance as oil etc

- ***We ensure an ecological** wastes incineration, according to the environment European law*

Your company activity will go on in peace with the authorities.

- ***We have the possibility** to incinerate the dangerous and toxic waste*

The need of managing dangerous and toxic waste is history.

- *For quantities of over 1000kg, we will pick up the wastes from your door and we also pick up all the dangerous and toxic wastes, no matter of quantity (we Bioflame ensure the transport and unloading security, according to the rules of Health Ministry)*

The transport cost is our problem.

- *We ensure assistance for managing your WASTE PLAN, according to the OMSF no.219/2002.*

You will have no problem to obtain the company authorizations.

What we will need to start our business?

- A location where we will build the plant
- To build a warehouse
- A supplier for the incineration plant
- license from officials
- Financial support (aprox. 500 000 €)

**The techniques which we will
implement**

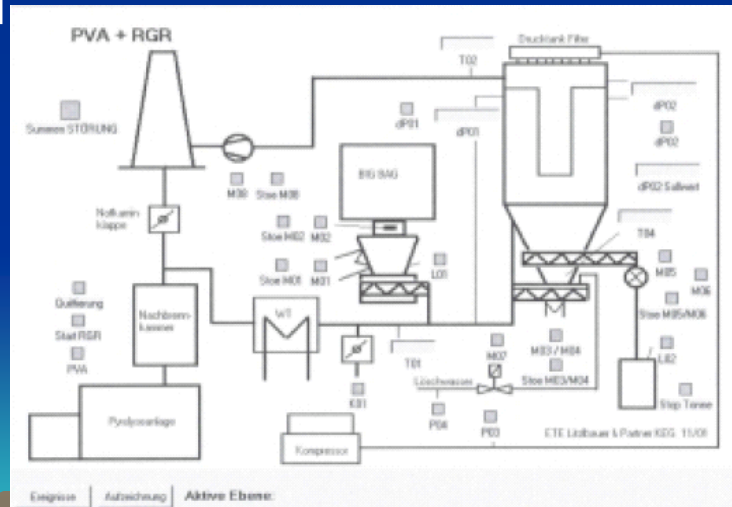

Incinerator FM-100 to FM-500

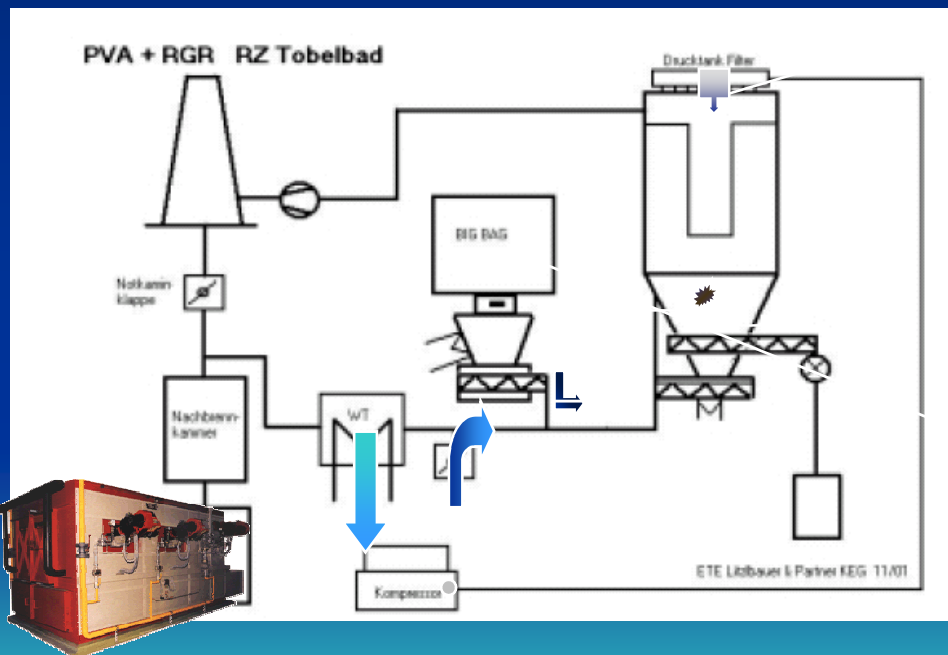

- ⇒ performance up to 500 kg/hr.
- ⇒ Siemens-Symatic-control
- ⇒ extremely high safety of equipment

Optional Equipment

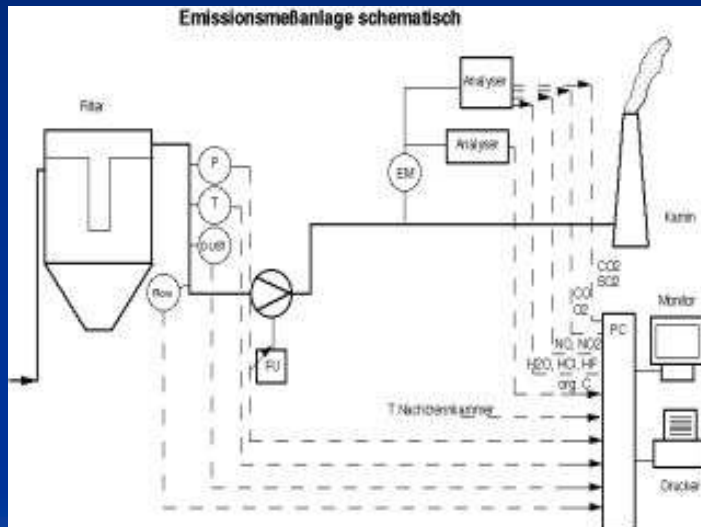

- ➔ automatic ash removal system
- ➔ automatic feeding system
- ➔ flue gas cleaning system
- ➔ chimney extension

Flue-Gas-Cleaning-System (FGCS)

Emission monitoring

Best Available Techniques for Waste Incineration (BAT)

Techniques for dust control

BAT: filter bags, with very good capable of retain particle over 0,1 micron

We will use: bags filters

Techniques for acid gases (HCl, HF și SO_x) emission

In dry systems with absorbent agents:

- Carbonate of calcium, lime semihydrated and bicarbonate of sodium
- reținerea dust will be restrained in filter bags

In wet systems:

- Scrubbers for wash with water
- scrubber for wash with milk lime, NaOH

We will use: dry system with hydrated lime and bag filters

Why our investment is successful?

- **New equipment**
- **low fuel consumption**
- **low pollution transmission**
- **low maintenance costs**
- **high efficiency**

THE COST

The processing cost is 2 EURO/Kg.

- The price can be negotiated depending on the waste composition and quantity, also the frequency of deliveries.
- You may also close an agreement, for frequently deliveries, and, in this case, we can grant you a serious discount.

Risks

- High costs of investment
- **The citizenship's wrong idea that a burningtrash factory is a pollution factor**

A close-up, low-angle shot of a hand holding a smartphone. The screen of the phone is the central focus, displaying the text "Invest in us!!!!" in white. The background is dark and out of focus, showing parts of the hand and the phone's frame. The lighting is dramatic, highlighting the texture of the hand and the glow from the screen.

Invest in us!!!!

The environment is safe with us!
